

Microwave Vacuum Equipment

Microwave vacuum equipment mechanical overview:

brand	Leader
capacity	500KG/ h
dominant power	15kw
certification	CE / ISO / SGS

Microwave vacuum machinery is a new type of microwave energy application equipment which combines microwave energy technology with vacuum technology,It has a series of advantages of microwave and vacuum drying, and overcomes the disadvantages of conventional processing technology such as long cycle and low efficiency, the working efficiency is 4~10 times higher than the conventional method.

The advantage of Microwave vacuum equipment product:

- 1.Various parameters can be adjusted at any time to meet the needs of a variety of production, a multi-purpose machine, saving costs.
- 2.Each system cooperates closely, the design is reasonable, the operation is smooth.

3. There is no waste water, waste gas and other harmful substances produced in the process of operation, clean, hygienic and environmentally friendly.

4. In line with national standards, wearing parts use ultra-durable materials, long service life, low maintenance.

Leader Microwave Equipment has a full specification of high quality microwave vacuum device, can meet the different requirements of customers. In addition, our vacuum equipment is widely used in various materials. Therefore, it is very suitable for investment in many parts of the world. It presents lucrative business opportunities. Welcome to contact us!

As one of the leading microwave vacuum machine manufacturers, Leader Microwave Equipment has developed a variety of hot-selling microwave vacuum equipment. The following are more parameters for your reference.

12kw Microwave sterilizer/30kw Microwave sterilizer/50kw Microwave sterilizer/Customized microwave sterilization equipment

Microwave vacuum equipment technical data:

model	DL-05	DL-10	DL-20	DL-30
food intake per hour	500kg	0.8-1t	1.5-2t	2.5-3t
total power	40kw/h	55kw/h	60kw/h	72kw/h
occupied area (L * W * H)	30*15*7m	35 * 15 *7m	45 * 15 *10m	50 * 15 *10m
lifetime	5-8 years old			
operating methods	continue			
energy	electrical energy			

Microwave vacuum equipment part of the final product display:

field crop/tea leaf/flavoring/The corn flour

Leader Microwave Equipment's Microwave vacuum Equipment mainly includes Microwave vacuum drying Equipment and Microwave vacuum sterilization Equipment. If you would like more information, please contact us!

Security Design:

1. PLC control system can be designed according to customer requirements, the operator and the machine separate, to achieve automatic production.
2. Microwave vacuum equipment is equipped with 304 stainless steel shell (protective shell), effectively protect the safety of operators.
3. The power supply section has a standardized control system to ensure safety.
4. Equipped with a sealing system, the microwave leakage is far lower than the national safety standards, to ensure a clean environment and production safety.

The cost of microwave vacuum equipment is the first concern of investors. Therefore, we hope to briefly analyze the cost of microwave vacuum equipment based on our successful cases and market research. In general, we should consider many aspects, including microwave vacuum equipment costs, plant and construction costs, operating costs, installation and maintenance costs, etc.

1. Vacuum machine price

First, the vacuum equipment itself will contribute most of the cost. In addition, the price of microwave vacuum equipment often varies with the working method and capacity. Usually, the higher the level of automation or capacity, the higher the price.

2. Space and construction costs

When you plan to purchase microwave vacuum equipment, you need to find a suitable site. To reduce the cost, you'd better choose a remote area with convenient transportation. In addition, you need to build some construction works. Our engineers will design the factory layout according to your actual situation to make full and reasonable use of your space.

3. Operating cost

Of course, you need energy and workers to run a microwave vacuum. Our equipment use very little electricity. In this way, you can save some fuel costs. Another part of the operating cost is labor input. In general, vacuum microwave equipment is simple and safe to

operate. Several workers can run smoothly.

4. Installation and maintenance costs

When you are looking for microwave vacuum equipment for sale, you should pay attention to installation and maintenance services. In general, our engineers will be on site to assist with the installation and commissioning of the basic construction work.

According to statistics, our equipment usually can work for 5 to 8 years. In the service life, we will provide after-sales tracking service, regular return visit, product update service. In addition, we offer a one-year free warranty on our vacuum equipment. If you have any questions, please contact us in any time.

To be honest, microwave vacuum equipment costs more than traditional machines. But it remains increasingly popular with investors. Over the years, Leader Microwave Equipment has helped install and operate Microwave vacuum Equipment in factories around the world, including Japan, South Africa, the Philippines, Indonesia, Canada, dominica, Romania, Hungary, Brazil, Nigeria, South Korea, and more.

Why is Leader Microwave Equipment's Microwave vacuum Equipment proving so popular?

Because microwave vacuum systems are profitable. First of all, as an emerging technology, it has the support from the governments of various countries, because its environmental protection design has obvious effects. Will be very helpful to the environment. Secondly, our microwave vacuum equipment is multi-functional, which is widely used to deal with waste tires, waste plastics, waste rubber, sludge, and so on. Abundant raw materials, low price, widely used. Therefore, investing in microwave vacuum equipment will bring you huge profits.

Microwave vacuum equipment and microwave thawing equipment for lunch meat has proved to be very promising. You can obtain all kinds of high quality final products after processing, which will bring you rich profits. Apart from selling quality vacuum Equipment, Leader Microwave Equipment can also offer you the most cost-effective business plans and complete services. We look forward to your consultation and on-site visit!
